

FRENCH ELECTROLYSIS SECTOR

Production goal for 2030

600,000 tons of hydrogen per year

Planned usage

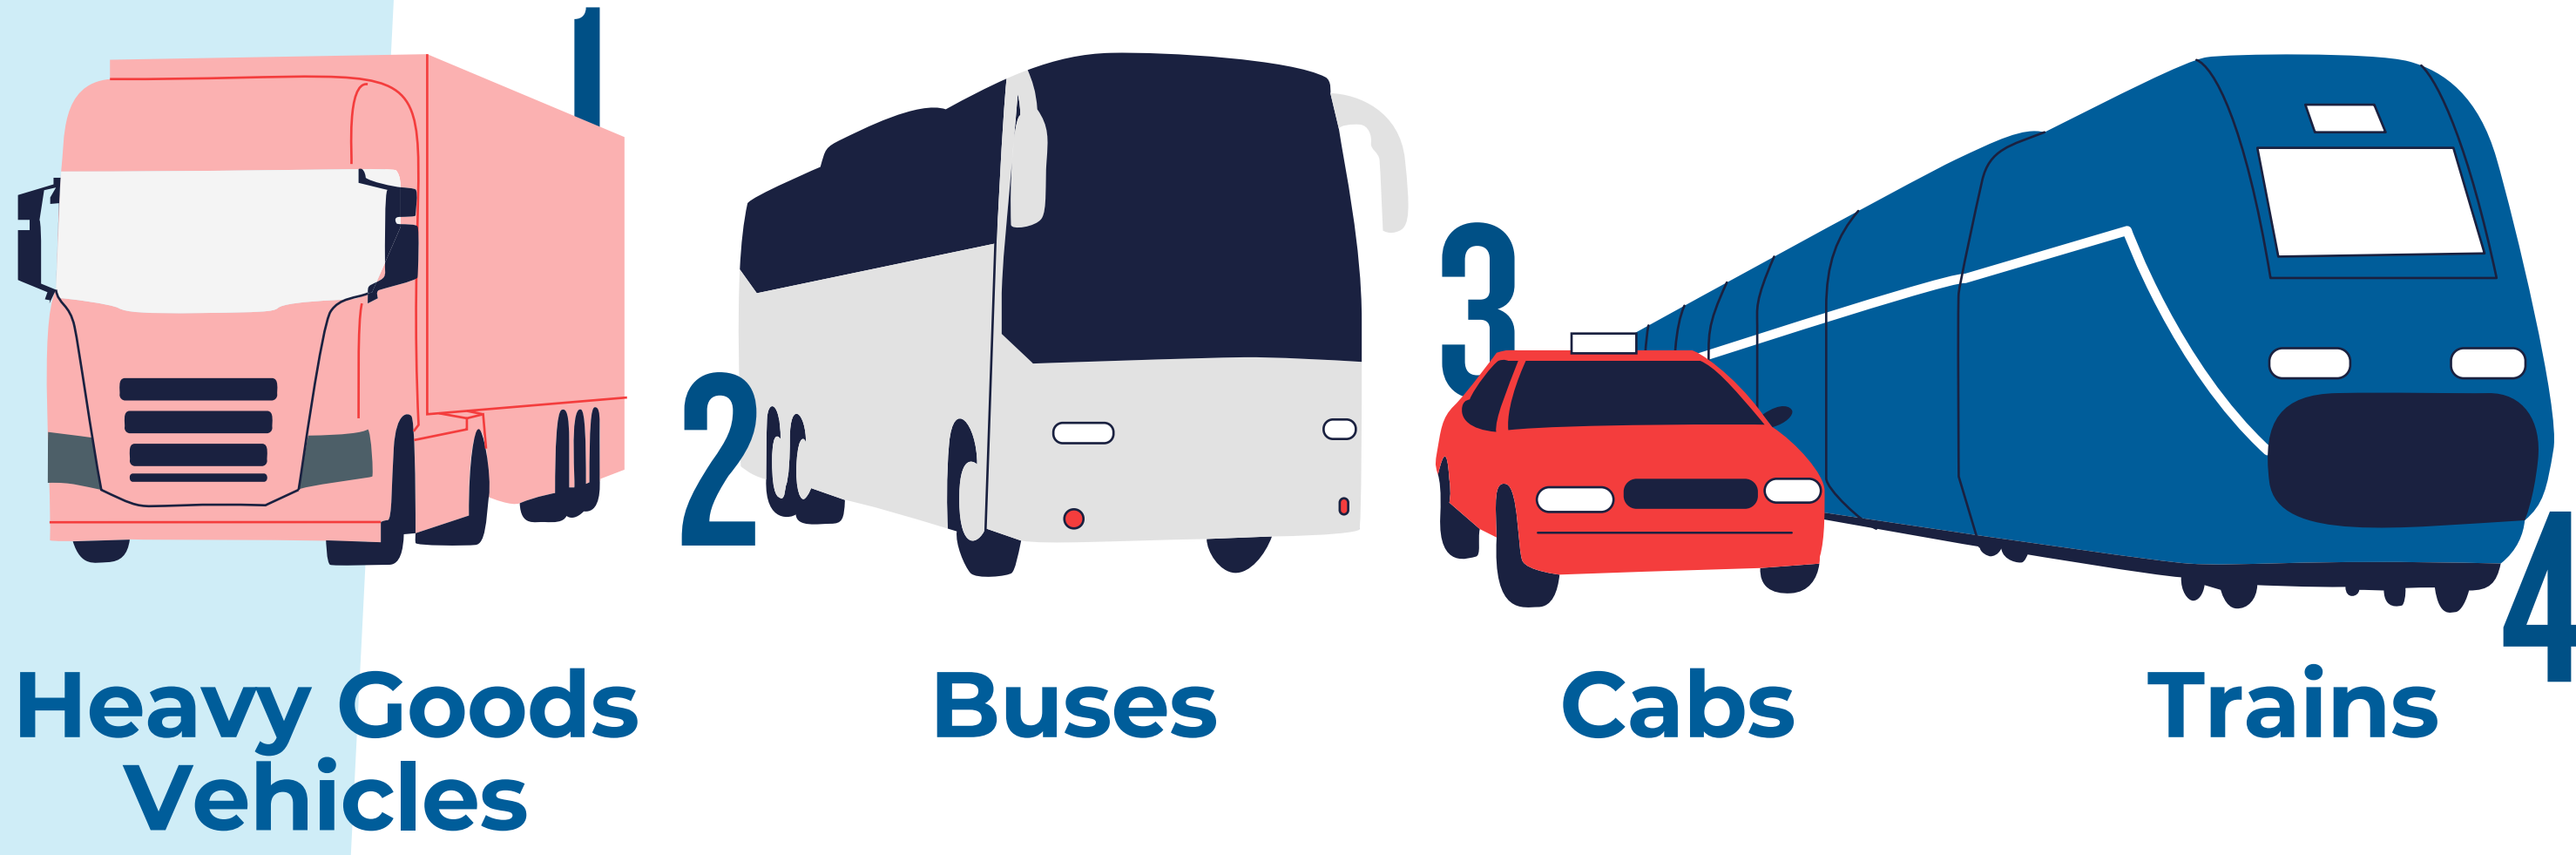

300,000 tons for Mobility

300,000 tons for Industry

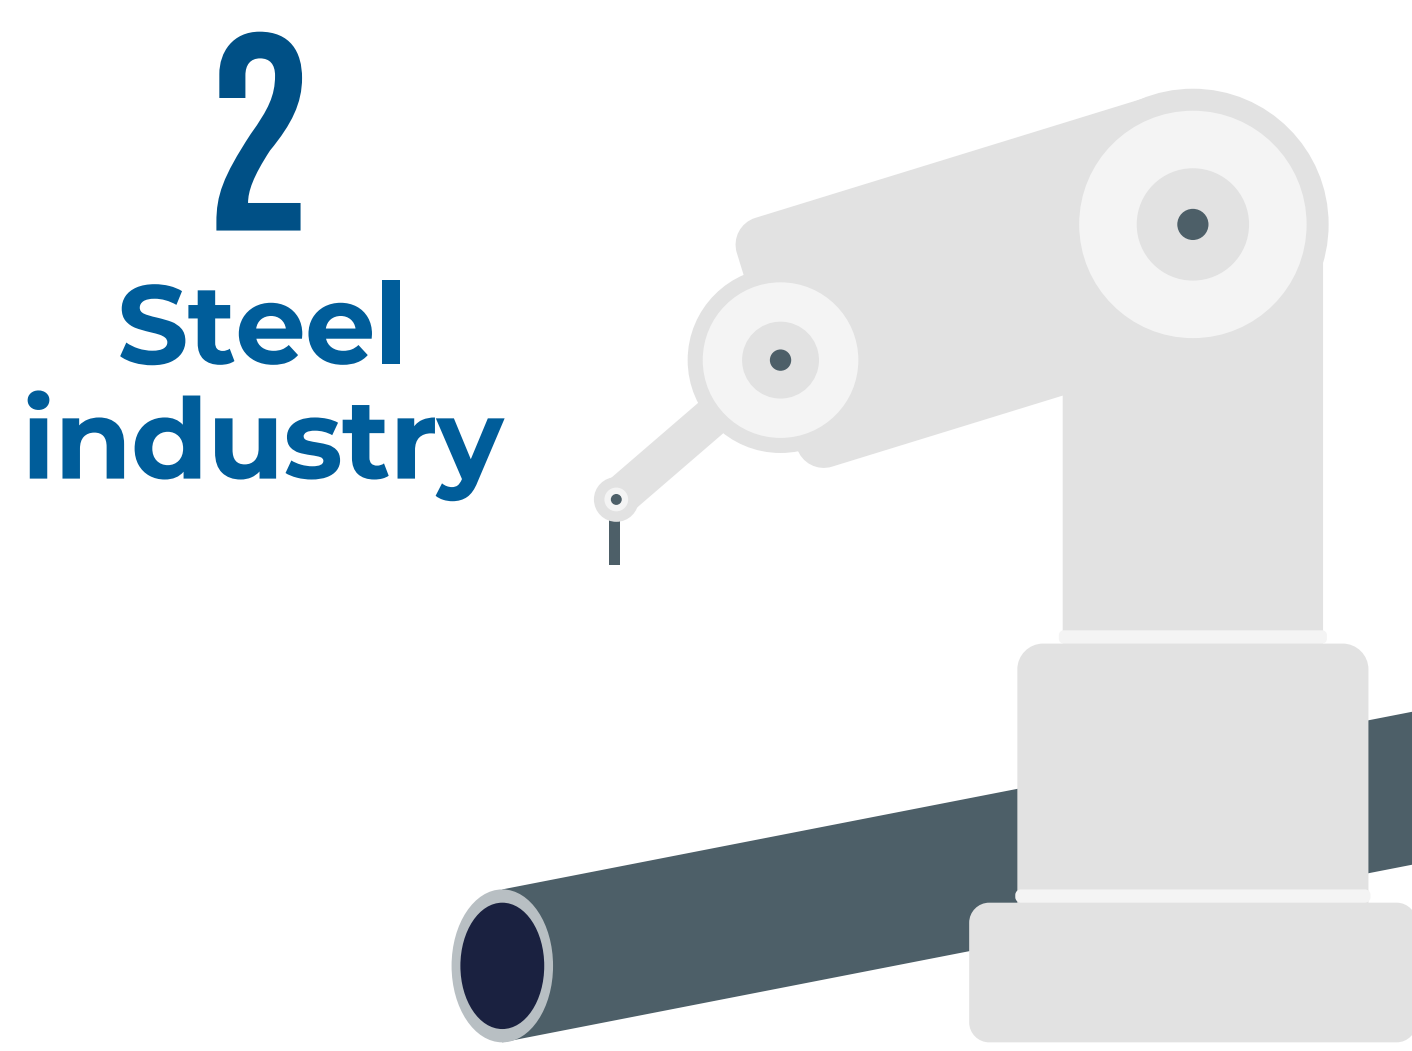

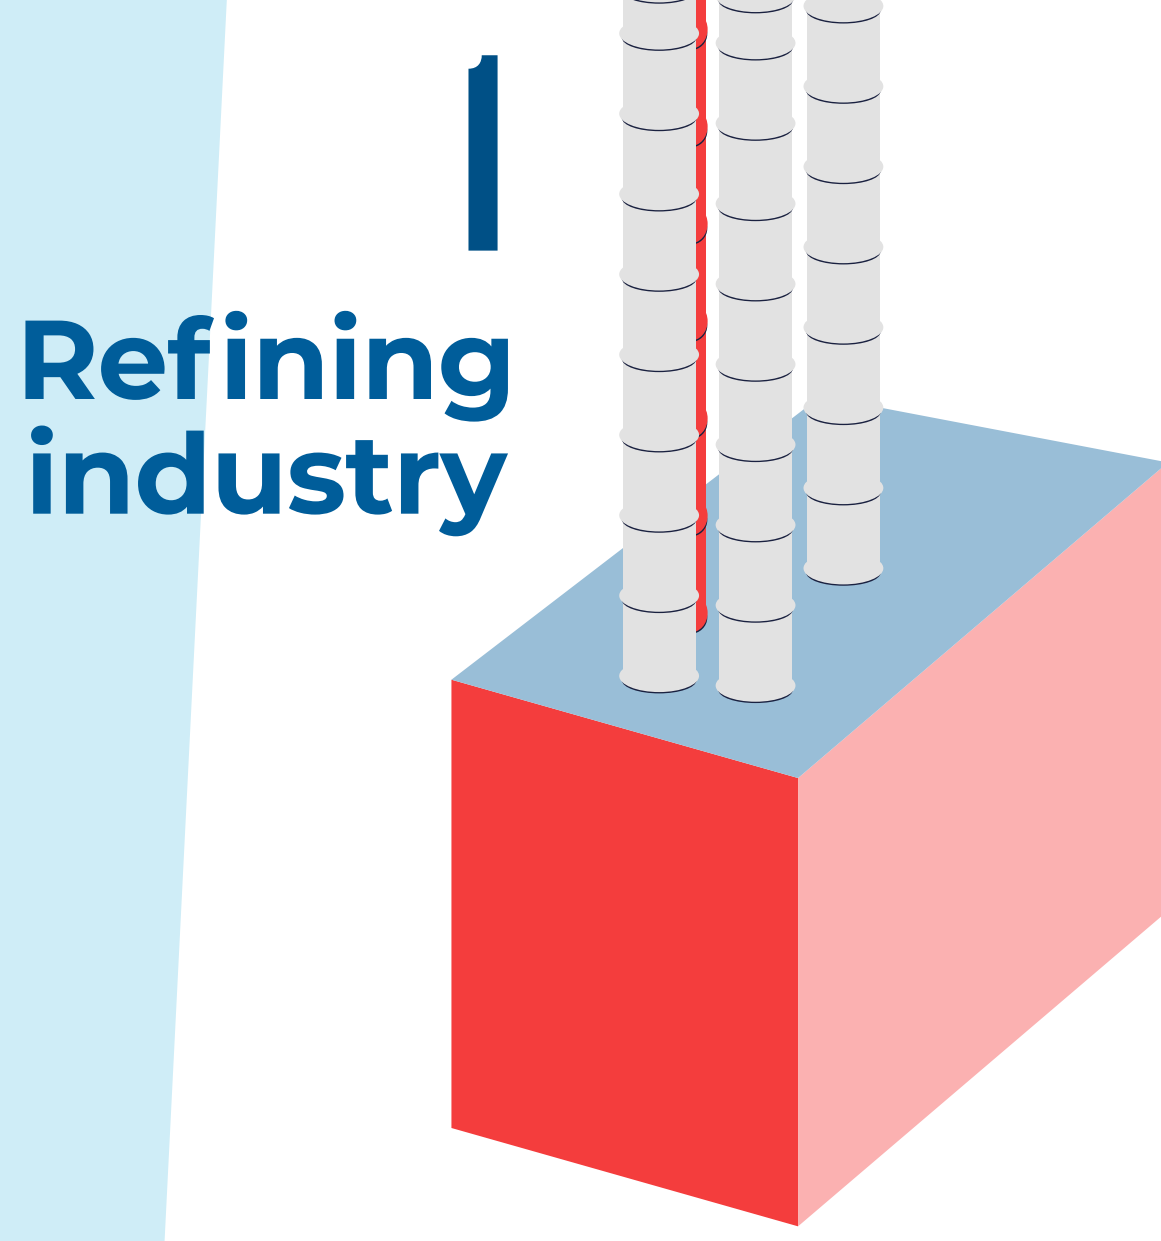

accounting for 10% of energy in the industry

Top priorities:

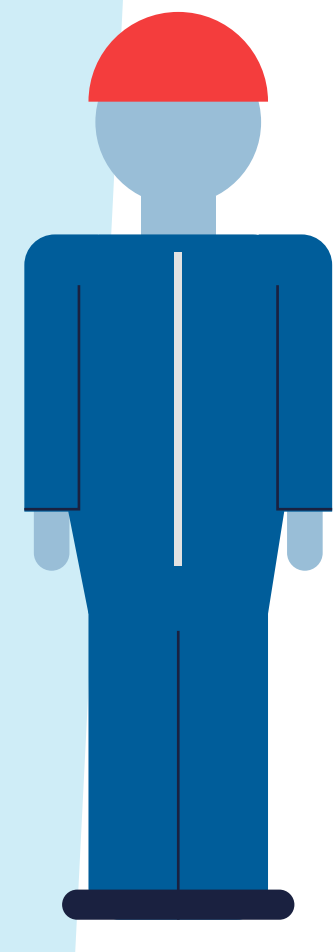

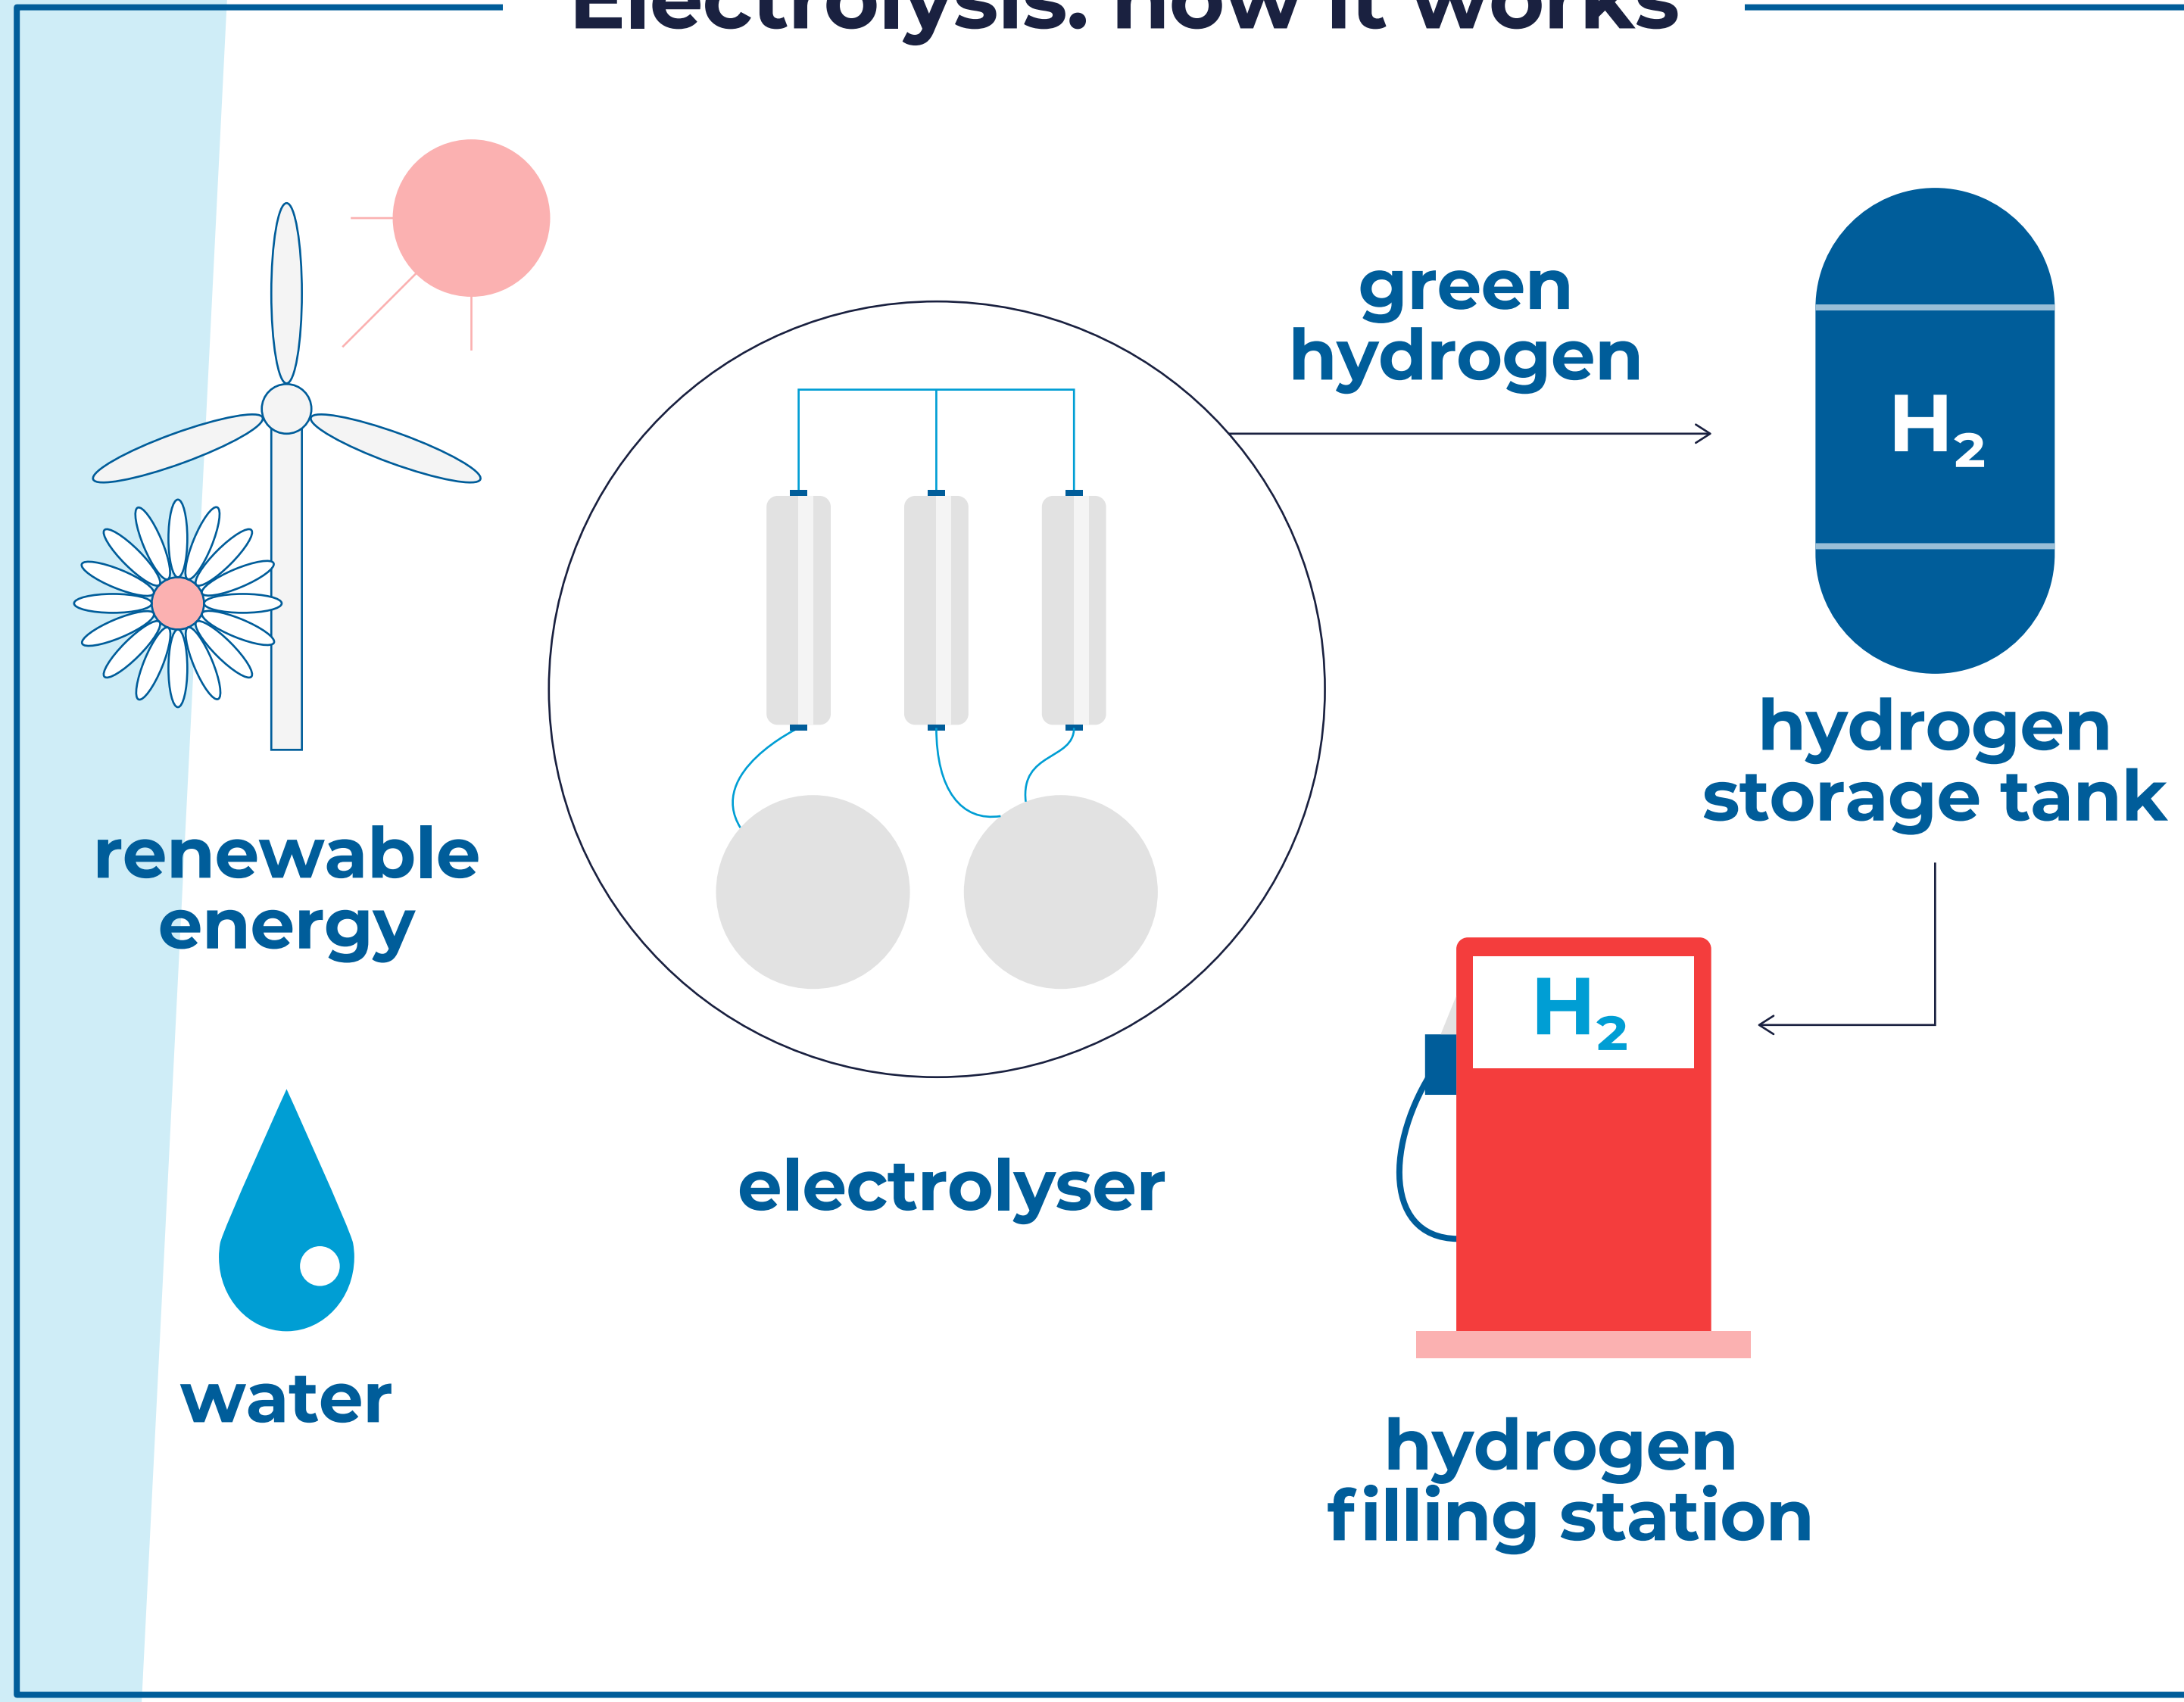

For Mobility

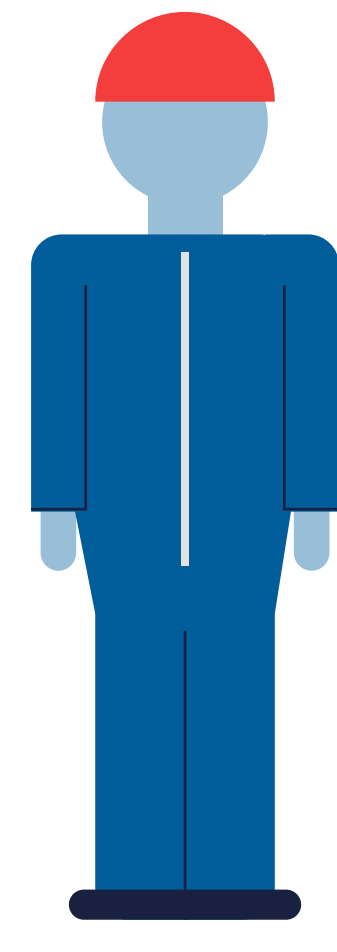

For Industry

Electrolysis: how it works

120,000 to 250,000 jobs Direct & indirect

20 million tons of CO₂ avoided in a decade

2020 → 2030
