

FULL PACKAGE STAND

Full package stand is a no-hassle solution for exhibitors who want to ensure their presence at the exhibition, but do not want to spend too much time, nor money on preparing a customized stand build.

It is a good starting point for any exhibitor, who looks for an easy solution, while at the same time allows for some possibilities for customization.

How the full package stand looks like?

Full package stand is a full service stand, build from shell scheme panels. The exact layout of the stand depends on the stand location – i.e; stand that is in the corner of the block of stands will have 2 sides open, stand that is in the middle of the row will have only one side open, but stand that has only one neighbor and shares with other exhibitor only one wall – can have all 3 sides open.

What is included in the full package stand?

Full Service Stands Size (in sqm)	Full Service Package
