

Partnership Press Release

## Resolux announces Partnership with Gexpro Services

Ørbæk – November 2021 – Resolux Aps and Gexpro Services

November 2021

Resolux, a Denmark-based Wind Energy component supplier, announces a partnership with Gexpro Services, a Dallas-based Global Renewable Energy services supplier, to offer enhanced, full-scale B- and C-class products with full-scale kitting to the Renewable Energy market.

This new partnership brings to bear enhanced service capabilities, including a full technology suite supporting Vendor Managed Inventory (VMI), global logistics management, manufacturing localization and import expertise, and end-to-end project management.

Resolux customers will benefit from enhanced commodity scope, including, but not limited to: high-strength hardware, specially-coated metric fasteners, small- and medium-sized machined components, complex welded fabrications, and fiberglass and composites.

Powerful Supply Chain Solutions

The Resolux DNA and leadership team will remain with a renewed focus on continuing to provide best-in-class customer solutions.

### **Availability**

The partnership will be announced ultimo November 2021

Powerful Supply Chain Solutions

## About Resolux Aps

The Resolux Group has been active in the wind industry for over 25 years and firmly established itself as a market leader in the supply of turbine tower and nacelle internals both for on-shore and off-shore applications. It has a global footprint with local presence in various core wind markets, including, but not limited to, Europe, China, Brazil, U.S and Turkey. Resolux has local representation, globally, securing its clients industry-leading supply chain management, including unique technical features, competitive pricing, and accurate delivery. Its in-house engineering supports customers with light calculations and cost-effective components within on-shore and off-shore specifications.

## About Gexpro Services

Gexpro Services is a world-class Supply Chain Services outsource provider, specializing in developing and managing production inventory management programs of C-class parts, supported by Vendor Managed Inventory (VMI), kitting, Kanban and logistical parts services on Point Of Use (POU) to support manufacturing OEMs and Tier 1 suppliers with their engineered production material specifications, fulfillment and quality requirements. Unmatched inventory, expertise, and dedication to Total Cost of Ownership (TCO) and customer success make Gexpro Services the first choice for the management of and C-class parts and logistical parts services.

Gexpro Services is headquartered in Dallas, TX US with locations in Canada, Mexico, China and Hungary, with service centers and sites supporting customers all over the world. Over the past 20 years, they have supported over 20,000 new wind turbines from OEM assembly, tower internals, blade builders, nacelle manufacturers, material shipped direct, and operations and maintenance support. This long and diverse experience delivers the broadest product and services offering in the market.
