

Navantia will present its new Green Energies division at Wind Europe Bilbao

- Navantia's Chairman, Ricardo Domínguez, and the Green Energies Director, Javier Herrador, will unveil the company's new brand for this area of business and its plans to support the development of clean energies.
- The company will showcase its capabilities to grow in offshore wind energy and hydrogen.

30th March 2022.- The Spanish, state owned, company Navantia will participate in Wind Europe 2022 trade fair, the most important event in the wind energy sector in Europe, which will be held in Bilbao, April 5th-7th and will host 330 companies and some 8,000 visitors.

At the event, Navantia will showcase its new Green Energies division, recently created as part of the company's reorganization to align all its activities around its main business lines and will unveil its new green energy brand.

The presentation event will be led by the President of Navantia, Ricardo Domínguez, and the Director of Green Energies, Javier Herrador, on April 5th at 12.00 (CET) at the company's stand (1-C60).

At Wind Europe, Navantia will highlight its eight year long experience participating in offshore wind farm construction projects for various national and international clients (including Iberdrola, EDP and Siemens), a total of 11 projects in five countries, and will showcase relevant innovations for the sector, such as its knots welding robot.

It will also outline the plans of its new division to increase its activity in this area, as well as in the field of hydrogen, where Navantia has experience and capabilities in the areas of naval propulsion and electrolyzers.

Attendance at the event will enable Navantia to boost its position in the sector, which is expected to grow by 13% per year until 2030 in Europe, strengthen its relationship with its customers and make itself known in new markets.

SUSTAINABILITY PLAN

Navantia will attend Wind Europe with a sustainability plan to ensure that its participation is sustainable and carbon neutral. The plan consists of 80 measures, most of them concerning Responsible Production and Consumption, including the use of recycled materials in the construction of the stand and the control and management of waste generated. The carbon footprint offsetting will be carried out at the official MITERD (Spanish Ministry for Ecological
