The coming years will be crucial for wind. Europe needs to be self-sufficient in energy for our own security. And the EU is calling for decarbonisation by 2050. Wind needs to take charge and meet these challenges.

Copenhagen is a chance for us to get ourselves on track. The entire sector will be there – every link of the value chain – in one of Europe's major wind hubs, ready to plan for a future powered by wind energy. New ideas, new models, new ways of doing business. Make sure you're a part of it!

It's great to meet in person again. Join us in Copenhagen in 2023!
