## NLMK DANSTEEL ANNOUNCES BLUE WIND®: THE NEW STANDARD IN STEEL FOR THE WIND INDUSTRY

NLMK DanSteel, a leader in heavy steel plates production, is proud to announce the launch of its new brand, Bluewind® devoted to the company's unique products and services to the fabrication of wind on- and offshore towers and foundations. Bluewind® is the result of years of product R&D, continuous investments, and market experience.

Bluewind® is a unique offer that addresses the challenges of the ever-growing turbine sizes and offshore conditions encountered by the wind fabricators. Its specialized steel products - *XXL plates joint-weld in lengths up to 47 meters, thickness up to 150 mm, and weight up to 120 tonnes in thermo-mechanically rolled and normalized conditions* - meet the requirements of even the largest turbine designs.

In addition, the company offers a full range of value-added services such as welding, milling, cutting, beveling, and a dedicated team to support customers from A to Z in managing their wind projects.

"We are very happy to announce Bluewind®, the result of many years of efforts, investments, and innovation. We are confident that our Bluewind® products and services portfolio will provide our customers with a complete solution for the wind industry. We are proud to play a major role in this rapidly growing industry and to support our customers with superior quality products and services." shared Christian Willumsen, General Manager NLMK DanSteel.

Thanks to its own port and sea location, NLMK Dansteel can offer to its customers hassle-free and just-in-time delivery as well as a fast track service- a unique feature in the steel plates sector. Thanks to the development of its new facilities located at Odense Port, Denmark, Bluewind® can provide to its customers XXL plates storage and handling, and welding, completing its exclusive service offering.
