

Green Eagle Solutions Unveils Autonomous Renewable Operations Management and Curtailment Solutions at Wind Europe Bilbao

The urgency to achieve a more sustainable future has never been greater, and [Green Eagle Solutions](#) is committed to transforming the way renewable energies are operated and supporting its clients in this transition.

In this regard, the company enables renewable assets to operate 100% autonomously thanks to its cutting-edge robotic software, ARSOS. The company's clients are able to implement revenue-based operations, thanks to **ARSOS**'s ability to seamlessly integrate multi-technology portfolios comprising wind farms, solar plants, hydroelectric facilities, as well as critical elements such as energy meters, electrical substations, and energy storage.

Green Eagle Solutions will participate in the Wind Europe Bilbao (March 20-22). Since the company attended the 2023 edition of this event, held in Copenhagen, it has been working hard to develop its solutions and capabilities. Among the milestones achieved, the company manages over 25 GW of renewables currently, with 17 GW specifically in Spain. This market share of approximately 30% underscores the company's commitment to the Spanish renewable sector and prepares Green Eagle Solutions to offer the same solutions in new markets throughout this year. On the other hand, so far in 2024, ARSOS autonomously executed over 72,000 curtailments in renewable plants. Regarding international expansion, the company already operates in more than 15 countries. Thanks to a [6 million euros investment round \(Series A\)](#), Green Eagle Solutions is ready to continue its expansion across Europe and the United States this year.

Join the Panel Discussion at Wind Europe Bilbao

As the energy sector manages the increase in renewable generation, curtailments, and low market prices, Green Eagle Solutions is hosting a Panel Discussion '[Collaborative Solutions for Renewable Curtailments](#)' (March 21, from 16:00 to 17:00, at the company's booth 3-F70) to discuss with key market players from Gnera, BayWa.re and Verbund Green Power Iberia and explore strategies that can mitigate the impact of this situation.

The event will close with a cocktail reception alongside other companies in the sector. The roundtable can be attended in person at the fair or via streaming ([registrations here](#)).

Let's talk!

Curious about how Green Eagle Solutions is transforming the way renewables are operated? You'll find the Green Eagle Solutions team at booth **3-F70** or **schedule a meeting** [via this link](#).

Let's shape the future of renewable energy together!
