

BEYOND ENERGY

Our Work

Born out of a strategic alliance between **EDP Renewables** and **ENGIE**, Ocean Winds is taking offshore wind power generation to its full potential, **leading the global energy transition into a greener future.**

Develop

We develop offshore wind farms to accelerate the energy transition, generating clean energy all over the world. We work hand in hand with all our stakeholders for our projects to benefit the local communities and create local opportunities.

Build

We build the infrastructures to make the most of the clean and endless energy that wind offers, with both bottom-fixed and floating offshore wind farms.

Finance

We finance and invest to support countries to achieve their net zero ambitions.

Operate

We operate projects driven by innovation, always striving to unlock new potential and tackle the challenges we face. We are a long-term partner, involved in the local economy and thriving on maximizing positive impacts.

Our People Worldwide

Our aim is to deliver more efficient and sustainable energy.

To achieve our goals we need dynamic people who are ready for challenges.
