

## WIND ENERGY INITIATIVE

# Workshop on effective Human Rights Due Diligence

Tuesday 21 April, 14:00 – 15:45  
IFEMA Madrid, Meeting room [TBC]

### Scope

In 2024 six leading companies in the wind energy supply chain launched the Wind Energy Initiative. The initiative is supported by Ecovadis and WindEurope. Together we want to elevate the sustainability performance standards of all suppliers within the wind energy industry.

Join us in Madrid to understand the wind industry's track record on upholding human rights and safe labour practices and help build the supply chain's capacity to implement and assess effective due diligence on human rights and labour practices.

### Agenda
