Salsa

Salsa is a durable needlefelt carpet with a rubber backing, made from 100% polypropylene (650 g/m²). The durability of the Salsa carpet and its rubber backing make it ideal for installation on top of Hall A's permanent carpet to prevent bumps and unevenness. The carpets are supplied in a width of 2 meters, meaning visible cut marks may occur during installation if more than 2 meters of width is used. All carpets come with a top film that should be removed either after installation or just before use.
