
PRESS RELEASE

SCADA International will launch its new version of OneView® SCADA at Windeurope Conference & Exhibition 2017 in Amsterdam

Silkeborg, Denmark, November 2017

OneView® SCADA, the all-in-one independent solution for wind farm management, has been optimized and numerous features have been added to make the system more functional.

"We at SCADA International see innovation as one of our key corporate values. Constant updates and seeking for new customized and flexible solutions is resulting in a development which is perfectly fitting the demands of our customers." said Thomas Vanting Bagger, CEO at SCADA International.

The official launch presentation is scheduled for 29 November 2017 at 8:00 AM at Hotel Novotel Amsterdam City and everyone interested in hearing more about the new features is welcome to attend. *Please note that a sign-up before November 24 is required!*

Features of OneView® SCADA 3.0

- **One-Click reports**
All your reports are just one-click away. This ensures LEAN processes and automates your office procedures and makes your work flow more efficient.
- **Information drill-down schemes**
Smart drill-down presents an analyst with a list of rules that together describe interesting aspects of the table thus widgets can pass on context to other widgets.
- **Multi-platform dashboards**
Presentations can be tailored towards different platforms (mobile, tablet, desktop).
- **Combine live and historical data**
Live events can set time context for historical data load e.g. up to the time when the event occurred.
- **Data context awareness**
This is to ensure that resource sharing between contexts stays functional and all widgets share information

About SCADA International

SCADA International enables the renewable energy sector to optimize production and reduce cost, through intelligent software and hardware solutions that capture live production data from various sources and turn them into decision supporting information.

Headquartered in Denmark, SCADA International employs close to 100 wind and SCADA specialists at offices in Germany, Poland, Ukraine, United Kingdom and USA. The company is certified according to ISO 9001, ISO 14001 and OHSAS 18001.
