Bilbao, Spain, March 27, 2019 – DNV GL, the world's largest independent energy advisory and certification body, announced its participation in [WindEurope 2019](#) one of the leading transmission and distribution trade shows in Europe gathering more than 7,000 delegates and 300 conference speakers. This three-day event will be held on April 2-4, 2019 at [BEC - Bilbao Exhibition Centre](#).

A DNV GL team of over ten energy industry professionals are attending the conference, including Santiago Blanco, Director and Area Manager Spain and Portugal, Michael Wilkinson, Energy Digitalization Segment Leader, Lucy Craig, Director, Technology & Innovation and Andreas Kamleitner, Head of Product Development and Sales in Renewables Certification.

"Being present at WindEurope underscores our dedication to support our customers and visitors in delivering a safe, reliable, efficient, and sustainable energy supply. DNV GL has contributed to the successful growth of the global wind energy industry for over 30 years, providing a full range of services for project developers, investors, financiers, manufacturers, owners and operators across the entire energy value chain. WindEurope Conference will be an ideal opportunity to discover how we can make our customers' wind energy projects even more successful.," said Blanco.

DNV GL experts will be welcoming you at the booth **# 3-D54 in hall 3** for additional inquiries and in-booth presentations throughout the event. An appointment can be made in advance by [visiting the company website](#).

Join us in Bilbao to learn more about our services and the challenges of the energy market in the renewables sector.

DNV GL has planned a series of activities in our stand, covering hot topics of today's wind industry. To learn more on the stand presentations, posters and conferences during the event, please [click here](#)

About WindEurope 2019 Conference & Exhibition

On 2-4 April in Bilbao, 300 exhibitors from 50 countries will join a top line-up of conference speakers in the conference, including Ministers from 5 different countries. The theme for the event is: Delivering a clean economy for all Europeans.

Why you should visit our booth at WindEurope Bilbao 2019?

We don't expect you to visit our stand just because it's a good place to meet likeminded energy experts. We are giving you four reasons on top of that to visit us on **Booth #3-D54, Hall 3** at WindEurope 2019.

1. Free DNV GL stand presentations

Are you interested in learning how to alleviate cyclone and earthquake challenges for wind farms? DNV GL is developing an [industry project \[GC1\]](#) to address the balance of reliability and safety of wind farms in existing practices and standards. Do you want to learn more about this topic or want insight on other industry themes? Don't miss our stand free-presentations during WindEurope 2019. See our schedule [here](#).

2. Read it yourself: DNV GL's Energy Transition Outlook

Our Energy Transition Outlook (ETO) has profound implications for transmission and system distribution operators. It predicts a faster and deeper energy transition than most future outlooks coming from the energy sector, including those from the International Energy Agency. Visit our stand to get deeper insight from one of our energy experts. Do you want to make an appointment? [Please suggest a time here that's convenient for you](#).

3. Hear it yourself: DNV GL's conference presentations

Seven energy experts from DNV GL will be giving presentations on a range of topics during WindEurope 2019, including: the challenges of decommissioning offshore wind farms; DNV GL's experience on Blade manufacturing flaws in operational assets; industrial analytics and data platforms as an enabler of increased collaboration in the wind industry; optimizing yaw control at wind farm level; extracting value from data; climate change impacts; and engineering models for turbine wake velocity deficit and wake deflection will be leading the conversation. Do you want to attend these conference sessions? Please view the program [here](#).

4. We want to meet you

We are passionate about safety, quality and integrity. We work together with our customers, industry partners, suppliers and other stakeholders to make improvements and innovations. We know that we can achieve more and have more impact by working together sharing goals and successes, so stop by our stand (**Booth #3-D54, Hall 3**) and let's talk.

Looking forward to seeing you!

Regards,

DNV GL
