

The Ingeteam Group showcases its technology at WindEurope

Ingeteam, April 2019. The Ingeteam Group, one of the world's leading suppliers in the wind industry, is to showcase its technology at the WindEurope 2019 Conference & Exhibition. This is the most important event in the European wind power sector, attracting more than 7,000 professionals and 300 exhibitors from 50 countries. The conference will serve to discuss the opportunities and challenges faced by the wind industry, as well as its role in the new energy model.

As a major global supplier to the sector, Ingeteam will be present at the summit and will be exhibiting its technology. The Group has production plants in Spain, the United States, Brazil, Mexico and India, allowing it to operate throughout the world. As part of its ongoing expansion strategy, in 2018 the company opened a new production plant in Chennai, India, and two new subsidiaries in Morocco and Peru.

Well-established as a leading ISP (Independent Service Provider), with maintained wind power of more than 8.6 GW, + 12 GW of total renewable power, Ingeteam Power Technology offers a wide range of wind turbine solutions as well as O&M services. The very latest version of Ingeboards, the company's pioneering lifetime extension tool, is to be showcased at WindEurope.

Likewise, the company is the world's #1 independent provider of wind power converters, boasting an installed capacity of 45 GW and an 8% market share. Ingeteam Power Technology offers low and medium voltage converters up to 15 MW, optimized for DFIG and Full Converter topologies. The converters are specifically designed to comply with the strictest grid codes. Air or air-water cooled solutions can be supplied for hostile environments.

Indar, an Ingeteam company, is the centre of excellence for wind generators. This technology company boasts a track record of 22 years in the wind power sector, providing innovative solutions for high performance and maximum efficiency. Indar has a highly qualified team of staff in Spain and in the USA, with a global installed power of 29 GW. The company is working jointly with the leading OEMs in the sector to create wind generator platforms (IG, PMG and DFIG topologies).

About Ingeteam Group

Ingeteam is an international group specializing in power and control electronics (inverters, frequency converters, controllers and protections) and electrical engineering and automation projects. Its range of products includes Indar generators, electric motors, and submersible motors & pumps. The Group completes its products and systems portfolio with operation & maintenance services. Ingeteam develops its products, systems and services for many different sectors: wind, PV, hydro and fossil fuel power generation; metal and mineral processing; mining; marine; rail traction; waters; e-vehicle charging; power grid, always striving towards more sustainable energy generation, transmission, distribution and consumption. The company operates throughout the world, and is permanently based in 22 countries, with a headcount of 3,900. R&D is the backbone of its business activity, in which 5% of its turnover is invested annually.
