

Booth #3-E60

## **Green Eagle Solutions to attend WindEurope 2019**

**Green Eagle Solutions, an independent SCADA solutions provider, will participate in the WindEurope Conference & Exhibition 2019. The event will take place in Bilbao from April 2 to 4, bringing together the most significant companies in the European wind energy sector.**

“Our presence at the most important wind energy event in Europe takes us one step closer to our goal of establishing Green Eagle Solutions as a leading player within the field of SCADA wind energy solutions,” says Alejandro Cabrera, CEO of Green Eagle Solutions. “We are already working with several clients in different European countries, and this event will allow us to meet many of them personally, as well as new companies interested in SCADA technologies.”

The WindEurope Conference & Exhibition 2019 will bring together more than 7,000 delegates from Europe’s wind energy industry. Green Eagle Solutions is keen to share its solutions with them at its booth (Booth #3-E60), located in hall 3. These include OEM SCADA Maintenance, Retrofit and 24/7 IT Support Service, Monitoring and Control SCADA Platforms and CompactSCADA Smart Energy Control Center Operations.

Green Eagle Solutions has been developing its CompactSCADA technology for the last six years. With extensive expertise in renewable SCADA technologies, the company’s team works with more than 200 assets connected to the CompactSCADA tool. This involves more than 2.2 GW of total installed capacity in countries such as Spain, France, the United Kingdom, Italy, Ireland, Croatia, Turkey, India and Indonesia. Green Eagle Solutions is a leader in the field of wind energy SCADA, capable of providing customized solutions to its clients in order to maintain and improve the performance of this essential wind farm element.

**More information:**

Green Eagle Solutions S.L. is a provider of SCADA solutions for renewable energy. Founded in 2012 by a group of engineers specialized in the sector, it develops and integrates tools to improve availability, life extension and increase the performance of wind farms and solar plants. All its solutions are based on its proprietary CompactSCADA® product. The philosophy of the company is to contribute to achieving greater efficiency in the operating costs of its customers and increase productivity for the evolution of renewable energy.
