

CRANELESS MAJOR COMPONENT EXCHANGER FOR MULTI MW TURBINES

PO.012

Emmanuel García de la Peña
KOALA AEROLIFTER www.koalalifter.com

WHY KOALA AEROLIFTER?

Koala can operate with the highest wind speeds defined by the wind turbine OEM for up-tower works

Koala operation range goes up to 100 m tower height and 22 Tons component weight

Koala is extremely safe, simple to install, quick and cost efficient

Koala can be operated with only 2-4 operators

Koala reduces drastically the downtime due to weather conditions or major crane availability

Koala Off-Shore version with 160 m tower height and 35 Tons component weight under development

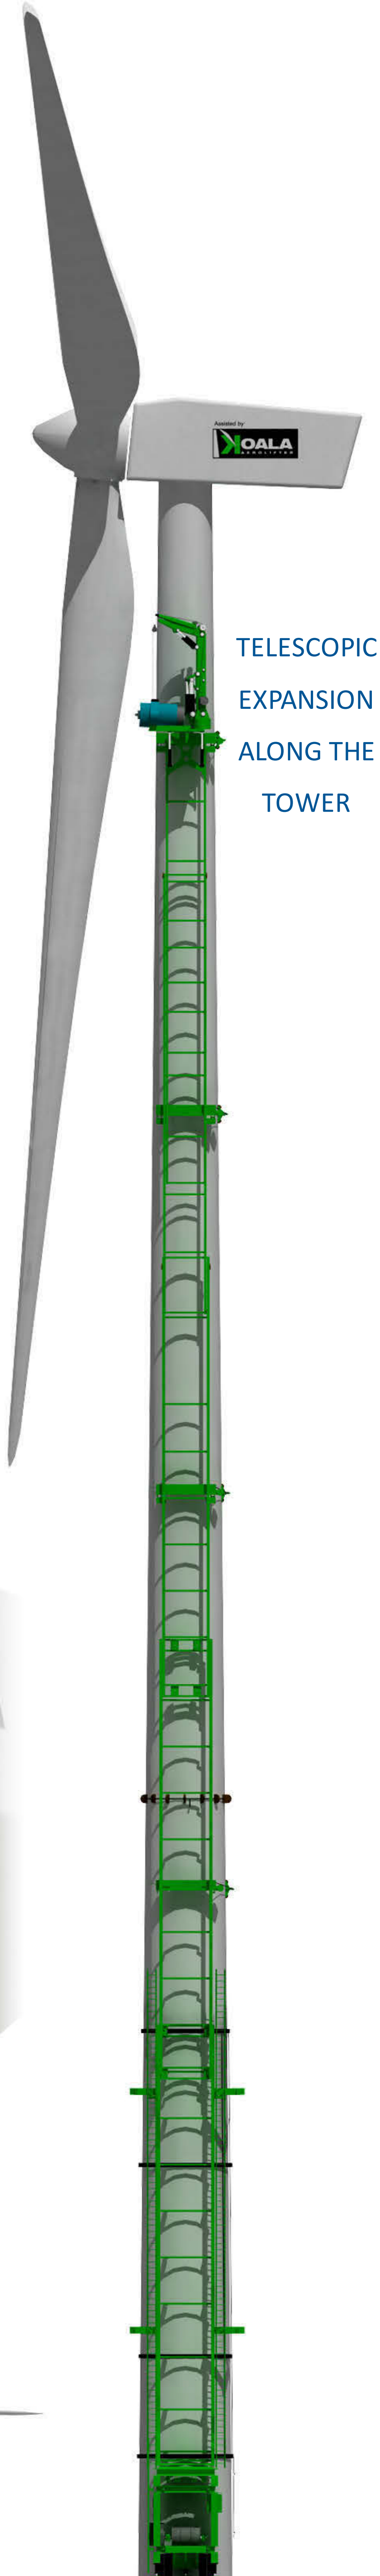

Koala shares the major component transportation truck
