

REF: WindEurope/2017/14
Analyst - Wind Energy Technology

As soon as possible

WindEurope, the European Wind Energy Association is the voice of the wind industry - actively promoting the utilization of wind power on behalf of member organizations in Europe and worldwide. Our resources are focused on lobbying and policy activities as well as global and national events and responding to enquiries from our members www.windeurope.org.

WindEurope is seeking an Analyst - Wind Energy Technology to be responsible for delivering internal analyses and external studies on research and innovation developments in wind energy.

Main Responsibilities:

Technology and business intelligence:

- Collect technical information on the main technology trends and business developments in wind energy in order to develop consistent and irrefutable arguments aimed at implementing effectively WindEurope strategy;
- Perform desk research and coordinate surveys among experts to create written material on wind energy research and innovation trends;
- Lead WindEurope Market Intelligence development by providing content to existing products and initiating new ones;
- Work in close collaboration with external technical experts from industry to identify research and innovation priorities;
- Peer reviewing and commenting research publications from international, EU institutions and projects in which WindEurope is partnering in a consortium;
- Administering and troubleshooting digital market intelligence products, databases and online tools.

Project Management

- Support the development of EU-funded project proposals in both, content and identification of relevant consortium partners.

Membership

- Coordinate the technical content information of one or more WindEurope Working Groups, Task Forces or ad-hoc networks;
- Advise WindEurope members on relevant decisions and industry developments at national and EU level;
- Implement and execute membership services in line with WindEurope objectives and strategy.

Advocacy:

- Develop, strengthen and broaden an extensive advocacy network across the EU institutions, national authorities, international organisations and other stakeholders relevant to his/her area of expertise;
- Formulate policy recommendations for decision makers in order to improve political and legal frameworks for wind energy, especially at EU-level;
- Write policy positions papers, reports, presentations and general materials related to his/her specific areas of expertise;
- Participate in external events and perform presentations to promote and disseminate WindEurope's messages to external audiences;
- Participate and actively contribute to WindEurope events;
- Answer external stakeholders queries related to his/her area of expertise, policies and other wind energy related topics or WindEurope work.

Budget

- Follow WindEurope procedures and systems in place for effective management of the budget assigned to his/her division or function.

Required Qualifications:

Education:

Master in Science/Engineering, candidates with wind energy or RES speciality are preferred, but it is not compulsory;

Experience:

Between 2 years to 3 years of relevant work experience in collecting, analysing data and writing technical reports on the wind energy sector

Personal skills:

- Strong technical knowledge on energy and renewables policies;
- Proven analytical and numerical skills;
- Knowledge on technology development processes and R&D
- Good to excellent understanding of RES and wind energy technology;
- Computer literate (MS Office, Outlook, website management, internet search engines) and basic programming languages like visual basic, html, python, C++
- Additional software and modelling tools are an asset
- Proven ability to manage complex organisational and political relationships
- Ability to engage with high level parties
- Self-confidence
- Problem solving attitude
- Strong ability to work under pressure and with tight deadlines

- Good time management and ability to prioritize
- Outstanding communication and presentation skills
- Thrives in a multicultural and international environment
- Ability to work as a team player as well as independently

Languages:

English (fluent written and verbal) is mandatory

Other languages are an asset to deal with external technical experts, subcontractors and members

Offer:

- Competitive remuneration package
- Challenging, international and enthusiastic environment
